

LEAN PRACTITIONER YELLOW BELT

Rapid Improvement Through Kaizen

Packing the basics of Lean improvement into a 2 day course you will learn the art of Kaizen improvement. Kaizen events are short but very effective improvement workshops designed to tackle problems quickly and effectively whilst stimulating a lean culture in all levels of the company.

This course teaches the Thinking, Approach and Tools required to implement Lean improvements through Kaizen based rapid improvement methodology.

As a result of PMI's Lean Practitioner Yellow Belt training you will:

- Understand how to identify and eliminate waste and non value added activity from processes
- Understand how to plan and execute successful Kaizen events
- Learn core Lean improvement principles such as Pull, Flow and Work Balancing
- Acquire skills in applying the main Lean improvement tools and be able to apply them back in the workplace
- Understand how Lean is applied in the context of process management
- Further develop your personal leadership skills in business improvement.

Delivery of Kaizen improvement

Kaizen methods enable you to guide small focused teams through the application of these approaches in order to bring about rapid process improvements and business benefits whilst stimulating an exciting continuous improvement culture.

You will be exposed to Lean improvement principles such as Waste Elimination, Pull and Flow as well as various tools and techniques that can enable the application of these principles. Throughout the course you are given the opportunity to practise the techniques using a live improvement simulation.

Course Outline

DAY ONE

- Introduction to Lean
- APPC Simulation
- Chartering Team
- Verifying performance with data
- Understanding the Voice of the Customer
- Cycle Time
- Value Add/Non Value Add
