

"Whole team of UX Academy was supportive along the whole course. Quickly reacting, offering information and help. I am really impressed by the level of competence presented by the teacher. And of course what cannot be overestimated, providing contact with real clients and engaging students in developing real products, this is a very important and valuable factor of this course."

**Asia Dechnik**  
Visual Designer

"I was so impressed with UX Academy. The content is expansive and the instructors are extremely knowledgeable. The course setup is well thought out and its fantastic you get to work on a real-life product. I've done a few courses and this is by far up there with the best. You feel well prepared for stepping into a role as a Product Designer. It's great value for money."

**Dan Perry**  
Multimedia Designer

"The course was very engaging and I enjoyed learning about Product Design. I already had pass knowledge about UX but this course helped plug in the gaps and help me become a stronger UX/ product designer. The teachers were very good at explaining all the different elements and stages and were very approachable. It's a great course."

**Alpa Pankhania**  
UX Manager
