

GOOD LABORATORY PRACTICE (GLP)

About this course

This interactive and engaging course examines the reasons why GLP is needed. It examines the regulations themselves, considers the personnel, equipment and facilities needed to conduct a non-clinical laboratory study that is GLP compliant, and uses scenarios to look at how these regulations apply in our own workplaces.

Who is the course suited to?

GLP regulates the practices of scientists working on the safety testing of prospective drugs. Compliance with GLP ensures the quality and integrity of data and that a true representation of that data is presented to the regulatory authorities.

Course Contents

Chapter 1- Introduction to GLP

Chapter 2- General Provisions

Chapter 3- Organisation and Personnel

Chapter 4- Facilities

Chapter 5- Equipment

Chapter 6- Testing Facilities Operations

Chapter 7- Test and Control Articles

Chapter 8- Protocol for and Conduct of a Non-Clinical Laboratory Study

Chapter 9- Records and Reports

Chapter 10- Disqualification of Testing Facilities

Price: £118.80 (inc VAT) Discount available for 6 or more users

Duration: Minimum 2-3 hours

As with all of our courses you are able to take this in your own time, on any device and are able to stop and start it at any time. Time may vary depending on how much you would like to access the many optional links so the time may vary.
