

General Data Protection Regulation (GDPR) for Clinical Trials

Training
Online 4U

About this course

This is a professionally developed, interactive and engaging online training course which examines the **implications** of the recent General Data Protection Regulation (GDPR) that became effective in May 2018 on those working in clinical trials. Pharmaceutical companies and CROs need to ensure that clinical trials are **GDPR compliant**. This course provides a certificate to demonstrate that you are up to date with this regulation and includes a handy checklist to check your compliance with GDPR in a clinical trial situation.

Who is the course suited to?

It is suitable for everyone working within clinical trials and also relevant for patients considering taking part in a trial.

Course Contents

- Understand what is meant by Data Protection and the privacy principles
- Gain an understanding of GDPR
- Understand the implications of GDPR for citizens including data subject rights
- Understand the implications of GDPR for Clinical Research
- Discover what you need to do to ensure compliance with the GDPR

Price: £58.50 (inc VAT) Discount available for 6 or more users

Duration: Minimum 2-3 hours

As with all of our courses you are able to take this in your own time, on any device and are able to stop and start it at any time. Time may vary depending on how much you would like to access the many optional links so the time may vary.
