A property manager is a person or firm engaged to manage the day-to-day operations of a real estate unit. When property owners and real estate investors are reluctant or unable to manage their properties themselves, they hire property managers.

Property managers offer an ideal solution for investors that do not live near their rental properties or simply do not enjoy dealing with tenants, toilets and so on. There are many real estate investors who do not wish to be hands-on about the investment, particularly institutional real estate investors.
