

In this globalization era, most animals are not safe in their natural habitat or lost their home. So, there is much work to do when it comes to animal care, protection and conservation. Veterinary clinics and zoos aren't the only places where you can work with animals. To impose regulations, you can find yourself diving into the depths of the ocean or traversing forests.

Here, we put together a list of 10 exciting and enjoyable job roles in the animal care sector, along with a required qualification. So go through them and involve yourself with nature's wonderful creatures!!!

## **1. Pet Behaviourist**

Pet Behaviourists are often consulted when cats or dogs show odd or concerning behaviour, typically after a veterinarian has ruled out any medical conditions. Pet owners may want to know why their pet is behaving this way and what they can do about it, usually so that both the animal and the owner will be happy and their relationship can be strengthened.

To do the job at first, you need to research animal behaviour or apply for a position working closely with animals (for example, in a dog kennel or an animal rescue centre) and practically learn about animal behaviour. Then dive into this exciting field.

## **2. Dog Walker**

A career as a dog walker could be a good fit for people who enjoy working with dogs. You don't need any special training, and seeking clients is as easy as posting a classified ad online. What you need is a passion for dogs and the desire to walk them every day (or multiple times a day).

As the dog owners have not much time to walk their dogs, they hire you to walk their dogs through making them healthy and happy. So, you'll need to figure out how many dogs you can handle at once and how many walks you can take each day. Since most dog walkers charge per dog and per walk, this would greatly impact how much money you make.

### **3. Pet Sitter**

Pet sitting is a perfect choice for animal-related employment because you can get paid to spend time with adorable animals without having to undergo extensive training. It's even possible to do it on the side while keeping your current work. When pet owners go out of town, the thought of having to kennel their animals is not always appealing. They may even have dogs that don't do well in kennels. As a result, pet owners seek the help of pet sitters. You can register with different web sites or advertise through local online and printed classifieds to connect with potential clients.

### **4. Animal Grooming**

Grooming is vital to work in the animal care industry. While some species need grooming, such as cats and horses, the area is most widely associated with dogs. Certain dog breeds necessitate regular care that many pet owners are unable or unable to perform. It is ideal if you receive any training in animal care or grooming to become a certified groomer. You must maintain a relaxed attitude and be secure in your ability to handle dogs of all sizes and temperaments.

## 5. Conservation Biologist

A career as a conservation biologist can suit those who are curious and scientifically inclined. These biologists fight for endangered species, habitat destruction, and the effects of global warming. Biologists work to conserve animals, their ecosystems, and the world as a whole through study and science. A bachelor's degree is necessary for a conservation biologist to have a successful career. You can gain helpful research and analysis skills as a result of such programs.

## 6. Veterinarian

One of the best-paying animal occupations is that of a veterinarian. Veterinary workers come in all shapes and sizes. Small and large animals, domestic and exotic, are all handled by mixed practice veterinarians. Others may focus on working with pets like dogs and cats. As a veterinarian, you can choose to work in science, researching diseases and other disorders in the hopes of discovering new treatments and cures.

## 7. **Animal Assisted Therapist**

If you enjoy helping people as much as you want animals, an animal-assisted therapy career might be right for you. Therapists may use animals to help patients with just about any cognitive, mental, or social disorder. Patients can benefit from the presence of animals because they can make them feel more encouraged and motivated.

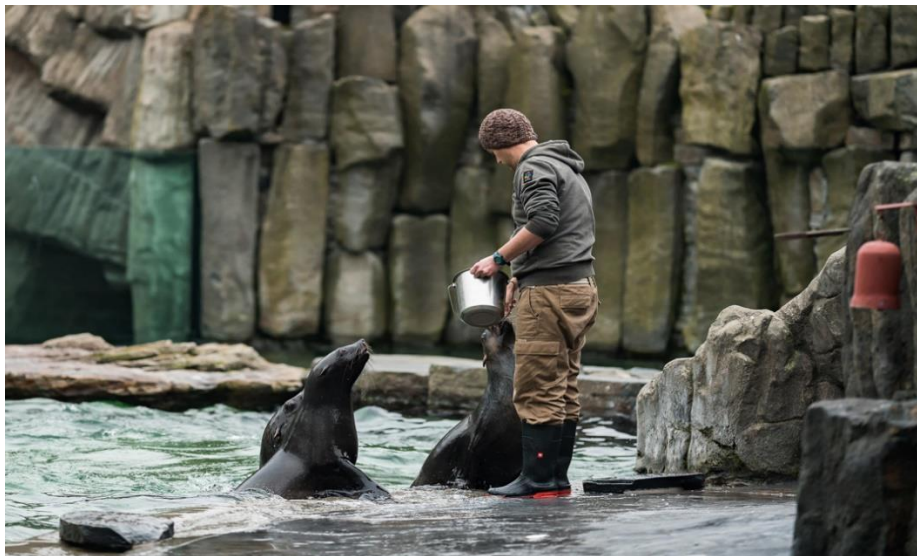

To work as an animal-assisted therapist, you should first pursue a degree in a field such as therapy, nursing, psychology, or social work. Once you've finished your preparation, you'll need to work on developing the additional skills required to incorporate animal therapy into your practice.

## 8. Animal Cruelty Investigator

Animal abuse inspectors are required to respond to and investigate allegations and gather evidence for prosecutions and convictions when this happens. It's undoubtedly one of the most emotionally draining jobs in the animal-related sector, but it's also one of the most significant and meaningful. You could find jobs at animal shelters, government agencies, or humane societies like the ASPCA (American Society for the Prevention of Cruelty to Animals).

## 9. Zookeepers

Zookeepers are in charge of looking after the care of animals in public areas such as zoos, safari or wildlife parks, aquariums, and other animal attractions. From lions and tigers to dolphins and penguins, these creatures could be everything. They generally ensure that animals have a healthy but stimulating environment to live in that closely resembles how they live in the wild. To become

a Zookeeper, you don't need a degree, but you will need to work hard to learn the knowledge and skills you'll need to succeed in the job and appreciate the animals you'll be caring for.

## 10. Wildlife Rehabilitator

Wild animals can become ill, wounded, or orphaned, or they can be unlawfully caught. A wildlife rehabilitator's function is to assist certain animals in returning to their natural habitats. Wildlife rehabilitation could be a good fit for you if you're looking for a career in animal health. You will make a significant contribution to the conservation of biodiversity while also ensuring public safety.

The education requirements vary by job, but some employers can require a bachelor's degree in a field related to biology, ecology, or veterinary medicine.
