

Certified Business Analysis Practitioner (IIBA-CBAP®) Certification Exam Prep

 churchillsquareconsulting.virtualinstructorledtraining.com/courses/certified-business-analysis-practitioner-iiba-cbap-certification-exam-prep/

Introduction:

The International Institute of Business Analysis (IIBA®) Certified Business Analysis Practitioner™ (CBAP®) certification has long been recognized as the gold standard in business analysis certifications. The high standards for eligibility and a rigorous exam have made this the most sought-after certification for senior Business Analysis (BA) professionals. This comprehensive workshop will help you make the most of your study time. The course was designed, created, and is taught by expert IIBA-certified instructors who will help you focus on critical study areas and provide insights into the exam. This course conforms to and aligns with the BABOK® Guide version 3.0 of the IIBA® (International Institute of Business Analysis). Whether working in traditional Waterfall, Agile or hybrid project environments, Business Analysis skills are central to facilitating communication and achieving consensus among stakeholders. From understanding the business need and writing business cases, to requirements management, through evaluating solutions, those filling the role of BA are addressing the most pressing issue facing businesses today: How to deliver value and meet the business need. CBAP® candidates will learn the full repertoire of BA techniques and elevate their understanding of their own experience as seen through the lens of industry best practices. The investment in a CBAP® certification enhances the effectiveness and professionalism of practitioners and translates into a robust return on the investment for both individuals and organizations that will benefit from improved business processes, higher rates of project success, and better business outcomes. This course satisfies the 35 hours of formal education required to sit for the CBAP exam.

Objectives:

Describe the overall data analytics framework and the six domains
Articulate the role of the business analysis professional in the data analytics framework
Understand the various tasks in each domain and the role of the business analyst in those tasks
