

## NEBOSH Health and Safety Management for Construction (UK)

10 DAYS

The Health and Safety Management for Construction qualification (CN) is aimed at anyone (managers, supervisors and workers) in the construction sector. It's ideal for anyone who needs a broad understanding of construction health and safety issues to be able to manage day-to-day risks effectively.

Many people take this qualification as a first step in a career in construction health and safety. It gives a valuable overview and is a sound basis for further professional study.

### Benefits for learners

The CN looks at everyday solutions for construction workplace health and safety issues.

When you have completed the qualification, you will be able to:

- advise on duties and manage construction risks under the Construction (Design and Management) Regulations 2015;
- justify the need for health and safety improvements;
- produce or contribute to a construction phase plan;
- help your organisation to manage contractors;
- positively influence health and safety culture and behaviour;
- carry out a risk assessment of a construction site and manage a range of construction hazards;
- recognise workplace changes and their impacts and understand how to minimise these impacts;
- develop basic safe systems of work that include emergency arrangements and know when to use a permit-to-work system; and
- take part in incident investigations.

### Professional membership

Holders of the qualification will be able to apply for the following membership:

Membership body	Membership category	Designatory letters
International Institute of Risk and Safety Management	Associate	AIIRSM

This qualification is also eligible for the Construction Skills Certification Scheme (CSCS) Academically Qualified Person (AQP) card scheme.

## Course Overview and Assessments

### **Unit CN1: Managing construction safely**

- Element 1: The foundations of construction health and safety management
- Element 2: Improving health and safety culture and assessing risk
- Element 3: Managing change and procedures
- Element 4: Excavation
- Element 5: Demolition
- Element 6: Mobile plant and vehicles
- Element 7: Working at height
- Element 8: Musculoskeletal health and load handling
- Element 9: Work equipment
- Element 10: Electricity
- Element 11: Fire
- Element 12: Chemical and biological agents
- Element 13: Physical and psychological health

## Assessments

There is one assessment in the form of an Open Book Examination (OBE). The aim of this assessment is for you to practically apply your knowledge and understanding gained from your studies of the CN syllabus.

The OBE is based on a fictional construction site, which includes theoretical and practical application questions and a scenario-based risk assessment exercise.

You will have 48 hours to complete this written examination from home or anywhere else they choose.

The OBE is evaluated by NEBOSH external examiners
