Microsoft Project and SPSS Software Training

About the course

Do you need to get to grips with Microsoft Project and SPSS?

Microsoft Project is the popular project planning package designed to assist you in creating, maintaining and tracking your plans. Our course offers an in-depth explanation of this extensively used project management package. This Microsoft Project training course will teach you how to make the most of planning and managing projects using Microsoft Project, building on your existing skills and teaching you to make the most of this powerful project management software.

Statistical Package for Social Sciences SPSS is a powerful suite of data analytics, reporting and modelling software. It is the data analytics software package of choice for people who need to analyse large amounts of quantitative data and is used as standard by a wide range of users who need to quickly and accurately carry out statistical analysis of that data. It has a very broad range of applications from the relatively simple like calculating frequencies and creating lists and charts through to the far more advanced like variance analysis, multivariate statistical analysis and cluster analysis. It can also be used to quickly and simply build predictive models.

Learning with Study 365 has many advantages. The course material is delivered straight to you, and can be adapted to fit in with your lifestyle. It is created by experts within the industry, meaning you are receiving accurate information, which is up-to-date and easy to understand.

This course is comprised of professionally narrated e-Learning modules, interactive quizzes, tests and exams. All delivered through a system that you will have access to 24 hours a day, 7 days a week for 365 days (12 months). An effective support service and study materials will build your confidence to secure your qualification.

365 Days	02 Modules	Exam Included
12 Guided Learning Hours	Course Certificate	Advanced, beginner and Intermediate

Who is it for?

This SPSS course is ideal for you if your job involves analysing data and you want to learn how to perform data analysis more quickly and efficiently while making the most of your data. Our course will show you how to set up statistical analyses with SPSS and interpret the results, so that you are able to apply them with confidence.

FAQs

✅ Who can take this course?

Anyone who has an interest in working in this field is encouraged to take the course. There are no entry requirements to take the course.

✅ What is the structure of the course?

The course is broken down in to modules. Each module takes between 10 and 60 minutes on average to study. Although you are free to spend as much or as little time as you feel necessary on each module, simply log in and out of the course at your convenience.

✅ Is there a test at the end of the course?

Once you have completed all modules there are multiple choice questions test. The questions will be on a range of topics found within the modules. The test, like the course, is online and can be taken a time and location of your choosing.

✅ What is the pass mark for final the test?

The pass mark for the test is 65%

✅ What happens if I fail the test?

If you don't pass the test first time you will get a second opportunity to take the test again after further study.

✅ When will I receive my certificate

Once you have completed your test you can log in to your account and download and print your e-certificate any time you need it. If you would prefer us to post you a printed certificate, there will be an admin charge of £29

✅ How can I pay?

We use PayPal for all payments on the site. You can either use your Visa, MasterCard, American Express, Solo cards or PayPal account to pay for the online course. All payments are handled securely by PayPal. We also accept bank transfer (BACs). Please contact us for more information about this

✅ Is my payment secure?

As previously mentioned your payment is totally secure. We don't get to see your payment details
